

CONSOLIDATED AGGREGATES

DELIVERING EXCELLENCE FROM EARTH TO INDUSTRY

PRODUCT CATALOG

Why Consolidated Aggregates?

Consolidated Aggregates is a trusted industry leader in the production and supply of high-quality decorative and construction aggregates and mixes. Backed by decades of experience and a commitment to excellence, we deliver materials that meet the highest standards of performance and consistency. Our extensive product portfolio supports a wide range of applications—from architectural and landscape design to concrete and specialty construction. With reliable distribution, technical expertise, and a focus on long-term client partnerships, we are dedicated to providing dependable solutions that build lasting value.

Gold 50/70

Available in 50 lb bag & 3,000 lb bulk bag

*Please note that while we make every effort to ensure color accuracy in our marketing materials, the color of our sands displayed may vary slightly due to differences in monitor settings, screen calibration, and printing processes.

Our industrial sands undergo an intense cleaning process with fresh water, particular gradation control, and a superior drying process that provides high-quality, consistent material to the market. Our sands are used in several industrial applications such as filter media, trowel and broadcasting, polymeric sand, athletic fields, and golf courses.

Almond

White

*Consolidated Aggregates works diligently to replicate the mortar color samples provided; however, due to varying lighting and normal printing limitations, these color samples might not accurately reflect the exact shade or hue of the mortar on your job. It is recommended you prepare an on-site sample using the same sand, masonry units, and construction practice that will be used on your project before finalizing the project's color selection.

We offer 12 colors of preblended Type S and Type N Masonry Mortars in either 60 lb. bags or 3000 lb. bulk bags. Mobile masonry silos are available for large commercial jobs.

These coverage charts shows users approximately how many square feet each product will cover when applied at a specific depth.

In 2003, after many years helping build a successful business with previous business partners, Laurence and Mark Turley came to a crossroad in life. They decided to bring a collection of experiences they had in business, mining, and aggregate supply and launch Turley International Resources. Their vision was to build the infrastructure that would support the product growth spanning multiple industries allowing the company to maintain the balance needed when mining their own materials. Their vision was also to help other strategic supply partners maintain that same supply balance. That vision is alive and well as seen in the growth of the business over the course of the last 23 years.

Consolidated Aggregates is a division of Turley International Resources.
